

STIRLING[®]

GAS COOKTOP

Features:

4 Gas Burners

4 Gas powered burners:
1 rapid burner, 2 semirapid
burners, 1 auxiliary burner.

Versatile Cooktop Layout

Provides ample space
for cooking a variety of
dishes at the same time.

Flame Failure Safety Device

Each burner is fitted with a protective
flame failure safety device,
which cuts gas off automatically
if the flame extinguishes.

Easy Clean Surface

The stainless steel surface,
lift off controls and
enamelled trivets make it
easy to clean up.

Quick Start Guide

IMPORTANT: This gas cooktop must be professionally installed by a licensed gasfitter/plumber. See the full instruction manual for comprehensive installation and usage instructions and important safety advice.

	Regulated for: Natural Gas			Regulated for: LPG		
	Inj. Ø (mm)	MJ/hr	Gas Pressure	Inj. Ø (mm)	MJ/hr	Gas Pressure
Auxiliary	0.85	3.6	1.0kPa	0.53	3.7	2.75kPa
Semirapid	1.16	6.5		0.72	6.6	
Rapid	1.49	10.8		0.93	11.0	
Total		27.4			27.9	

Using the cooktop

Step 1: Use an appropriately sized pan for each burner.

Step 2: The control panel at the side of the cooktop has four control knobs, one for each burner; the small diagram to the right of each knob illustrates which burner it controls.

Step 3: To light a burner, press down the appropriate control knob gently and turn it anticlockwise to the HIGH position. When the burner lights, keep the knob depressed for approximately 20 seconds to ensure it stays lit when released. Turn the knob to the required position, anywhere between the HIGH and LOW settings. Do NOT set it between OFF and HIGH. In the event of a burner flame being accidentally extinguished, turn off the burner control and wait for at least one minute before reigniting it.

Step 4: After use, always turn the control knob to the OFF position.

Consult the full instruction manual for comprehensive installation, usage and cleaning instructions and important safety advice.

Model Number	STR-BGC
Gas Burners	4
Warranty	3 Years In Home
Version	QSG-V1.0
