

STIRLING[®] *Designer Collection*

Burr Coffee Grinder

Quick Start Guide

Please read the full manual for comprehensive instructions and safety advice before first use. This Quick Start Guide only contains basic information.

Step 1

Fit the ground coffee container with its lid in its correct position on the bottom plate. Check and ensure that the coffee bean hopper is correctly positioned – the lock icon should be aligned with the [|] marking.

Step 2

Fill the desired quantity of whole coffee beans into the coffee bean hopper. Close the lid.

Step 3

Adjust the coffee grind size to your requirements – the larger the number, the coarser the grind.

Step 4

Plug in the grinder. Rotate the cup dial and select the number of cups: 2, 4, 6, 8, 10 or 12.

Step 5

Press the START/STOP button to start grinding. The machine will stop automatically and a buzzer will sound when enough coffee has been ground for the number of cups selected.

Step 6

After grinding, remove the ground coffee container and scoop out the ground coffee.
